The Complementary Therapist's Guide to Red Flags and Referrals E-Book Nov 11 2021 Unique ready reference for all complementary medicine, massage therapy and manual therapy practitioners and students alerting them to 'red flag' symptoms which should be referred for Western medical investigation or emergency medical treatment. When can a patient be safely reassured and when do they need further investigation or treatment? 'Red flags' are clinical signs that suggest a patient needs prompt investigation and treatment for a potentially dangerous situation. Therapists increasingly find themselves working alongside conventionally trained doctors and nurses and it is vital for them to understand conventional medical diagnoses, symptoms and treatments and, crucially, to recognise warning signs of serious disease. This is essential in order to be a safe practitioner. Clare Stephenson's The

Complementary Therapist's Guide to Red Flags and Referrals meets this need by providing an easily accessible reference to 'red flag' symptoms, designed especially for therapists. It offers guidance on how best to respond to those symptoms and signs of disease which can be readily discerned through routine history taking and basic examination of the body. The guidance is in language which is accessible to therapists, and clear advice is offered on when to refer patients to conventional medicine practitioners and how to communicate with doctors when making a referral. Clinical syndromes which merit rapid response are summarised for ease of reference.

Single Reference Guide for Scrum Certification May 17 2022 Scrum has the magnetic characteristic to attract the individuals and organizations to adopt Scrum and achieve high value. Flexibility, creativity and productivity not only motivate those who work on projects but also give most favorable results to the organizations. The structure and unique features of this book that can help aspirants to adopt Scrum and get certified in PSM I or PSPO I examinations are: 1. Scrum Theory: Cover everything which is part of Scrum Guide. We have not adulterated the concepts of Scrum Guide in any manner. "Information Nuggets" are added at the end of the chapters to explain those aspects that need a little more explanation. 2. Additional Concepts: These topics are either mentioned in the Scrum Guide but not explained or are not part of Scrum Guide but are often asked in certification examinations. 3. Questions (400 Unique): This unit has 5 Model Test Papers (MTPs). Each MTP has 80 questions. We have endeavored to minimize repetition to zero levels. These 400 questions are result of in-depth research of those who train professionals to prepare for certification examinations and those who apply Scrum Framework in organizations. Master these 400 questions to clear PSM I or PSPO I certification exam in first attempt itself. 4. Scrum Rules in Tabular Format: Scrum journey requires referring to the Scrum rules as and when required. In Scrum Guide, these rules are not given separately and are merged with the theory. It is a time-consuming and tedious exercise for users to search these rules in theory. We have simplified this tedious exercise through a tabular format.

Teaching Pearls in Noninvasive Mechanical Ventilation Jul 19 2022 This book uses real-world clinical case analyses of hot topics to provide insights into noninvasive mechanical ventilation (NIV). Written by leading international teachers and experts, it features a selection of "major controversial topics in clinical practice" and demonstrates how these cases can be used to teach about NIV. It then presents a discussion of the topics in various scenarios (anesthesiology, critical care, emergency, pneumology and sleep medicine, as well). The chapters allow readers to develop a case-by-case understanding of NIV in acute and chronic respiratory disorders, and perioperative and in intensive care patients, also thanks to Electronic Supplementary Materials. Lastly the authors summarize five key points / recommendations. This book is an attractive resource also for universities / educational seminars / national and international postgraduate courses and hot-topics sessions at national/international congresses.
