It is not intended to be a complete grammar of the language. Rather, its purpose is to present, mainly in the form of easily read tables, essential

reference information such as the rules of sandhi, the declensional and conjugational paradigms, and the principal parts of major verbs. About two-thirds of the book consists of tables. The remainder is text, with advice on how to use the tables and explanations of the grammatical information has been abstracted, with substantial modification of the presentation, from existing Sanskrit grammars, especially those of Whitney, MacDonell, and Kale. An exception is the set of three indexes: Index to verb stems, Index to verb endings, and Index to noun endings (Tables 28-30). These probably have no counterpart elsewhere. The manual originated as a set of photocopied notes which was supplied, as a supplement to existing textbooks, to first and second year students of Sanskrit in the Department of Studies in Religion at the University of Queensland. Over a period of seven years those notes were progressively modified and expanded until they became the present fairly comprehensive reference work. Fully updated, the third edition of this quick reference delivers targeted guidance on the diagnosis, treatment, and management of orthopaedic problems and sports injuries. Its concise, bulleted format allows readers to quickly locate the exact information they need at the point of care. In addition, it covers musculoskeletal examination and evaluation; casting and splinting; imaging techniques, and rehabilitation strategies. The book features many full color illustrations, clinical photographs and radiographic images to demonstrate physical examination techniques and pathologic physical findings, as well as tables and figures to aid in diagnosis. TOPICS INCLUDE Common sports injuries Fractures Trauma Limb disorders Spine disorders
