Advances in Oriental Document Analysis and Recognition Techniques Feb 18 2020 In recent years, rapid progress has been made in computer processing of oriental languages, and the research developments in this area have

resulted in tremendous changes in handwriting processing, printed oriental character recognition, document analysis and recognition, automatic input methodologies for oriental languages, etc. Advances in computer processing of oriental languages can also be seen in multimedia computing and the World Wide Web. Many of the results in those domains are presented in this book.

*Document Analysis Guide for for MicroStrategy Analytics Enterprise* Nov 09 2021 The Document Analysis Guide contains instructions for business analysts to execute and analyze a document in MicroStrategy Desktop and MicroStrategy Web, building on basic concepts about projects and reports presented in the MicroStrategy Basic Reporting Guide.

*Structured Document Image Analysis* Sep 19 2022

Document image analysis is the automatic computer

interpretation of images of printed and handwritten documents, including text, drawings, maps, music scores, etc. Research in this field supports a rapidly growing international industry. This is the first book to offer a broad selection of state-of-the-art research papers, including authoritative critical surveys of the literature, and parallel studies of the architecture of complete high-performance printed-document reading systems. A unique feature is the extended section on music notation, an ideal vehicle for international sharing of basic research. Also, the collection includes important new work on line drawings, handwriting, character and symbol recognition, and basic methodological issues. The IAPR 1990 Workshop on Syntactic and Structural Pattern Recognition is summarized, including the reports of its expert working groups, whose debates provide a fascinating perspective on the field. The book is an excellent text for a first-year

graduate seminar in document image analysis, and is likely to remain a standard reference in the field for years.

### **Document Analysis and Recognition - ICDAR 2021 Workshops**

Jan 19 2020 This book constitutes the proceedings of the international workshops co-located with the 16th International Conference on Document Analysis and Recognition, ICDAR 2021, held in Lausanne, Switzerland, in September 2021. The total of 59 full and 12 short papers presented in this book were carefully selected from 96 contributions and divided into two volumes. Part I contains 29 full and 4 short papers that stem from the following meetings: ICDAR 2021 Workshop on Graphics Recognition (GREC); ICDAR 2021 Workshop on Camera-Based Document Analysis and Recognition (CBDAR); ICDAR 2021 Workshop on Arabic and Derived Script Analysis and Recognition (ASAR 2021); ICDAR 2021 Workshop on Computational Document

Forensics (IWCDF). The main topics of the contributions are document processing; physical and logical layout analysis; text and symbol recognition; handwriting recognition; signature verification and document forensics, and others.

*Document Analysis and Recognition with Wavelet and Fractal Theories* Apr 14 2022

Many phenomena around the research in document analysis and understanding are much better described through the powerful multiscale signal representations than by traditional ways. From this perspective, the recent emergence of powerful multiscale signal representations in general and fractal/wavelet basis representations in particular, has been particularly timely. Indeed, out of these theories arise highly natural and extremely useful representations for a variety of important phenomena in document analysis and understanding. This book presents both the development

of these new approaches as well as their application to a number of fundamental problems of interest to scientists and engineers in document analysis and understanding. Contents: Basic Concepts of Document Analysis and Understanding Basic Concepts of Fractal Dimension Basic Concepts of Wavelet Theory Document Analysis by Fractal Dimension Text Extraction by Wavelet Decomposition Rotation Invariant by Fractal Theory with Central Projection Transform (CPT) Wavelet-Based and Fractal-Based Methods for Script Identification Writer Identification Using Hidden Markov Model in Wavelet Domain (WD-HMM) Readership: Professionals, researchers, academics and graduate students in pattern/recognition/image analysis, machine perception/computer vision, and electrical & electronic engineering. Keywords: Document Analysis; Recognition; Wavelet

Theory;Multiresolution Analysis;Hidden Markov Model;Fractal Dimension;Box Computing Dimension  
Doing Document Analysis Feb 24 2023 Grounded in real examples, this book gives you the skills and confidence to conduct rich, systematic analysis of print and digital documents.

Document Analysis Systems: Theory and Practice Jun 04 2021 Recently, there has been an increased interest in the research and development of techniques for components of complete document analysis systems. In recognition of this trend, a series of workshops on Document Analysis Systems commenced in 1994, under the leadership of Henry Baird. The first workshop, held in Kaiserslautern, Germany, in October, 1994, was chaired by Andreas Dengel and Larry Spitz. The second workshop on Document Analysis Systems was held in Malvern, PA, USA, in October, 1996, chaired by Jonathan J. Hull and Suzanne Liebowitz Taylor. The DAS workshop has been one of the

most prestigious technical meetings, bringing together a large number of scientists and engineers from all over the world to express their innovative ideas and report on their latest achievements in the area of document analysis systems. The papers in this special book edition were rigorously selected from the Third IAPR Workshop on Document Analysis Systems (DAS'98), held in Nagano, Japan, on 4 - 6 November 1998. It is worth mentioning that the papers were chosen for their original and substantial contributions to the workshop theme and this special book edition. From among the 53 papers that were presented by authors from 11 countries at the DAS'98 after critical reviews by at least three experts, we carefully selected 29 papers for this special book edition. Most of the contributions in this edition have been expanded or extensively revised to include helpful discussions, suggestions, or comments made during the workshop.

**Document Analysis and Recognition - ICDAR 2021 Workshops** Dec 30 2020 This book constitutes the proceedings of the international workshops co-located with the 16th International Conference on Document Analysis and Recognition, ICDAR 2021, held in Lausanne, Switzerland, in September 2021. The total of 59 full and 12 short papers presented in this book were carefully selected from 96 submissions and divided into two volumes. Part II contains 30 full and 8 short papers that stem from the following meetings: Workshop on Machine Learning (WML); Workshop on Open Services and Tools for Document Analysis (OST); Workshop on Industrial Applications of Document Analysis and Recognition (WIADAR); Workshop on Computational Paleography (IWCP); Workshop on Document Images and Language (DIL); Workshop on Graph Representation Learning for Scanned Document Analysis (GLESDO).

**Document Analysis Guide for MicroStrategy 10** May 03 2021

Handbook of Character Recognition and Document Image Analysis Apr 21 2020 Optical character recognition and document image analysis have become very important areas with a fast growing number of researchers in the field. This comprehensive handbook with contributions by eminent experts, presents both the theoretical and practical aspects at an introductory level wherever possible.

Contents: Pattern Classification Techniques Based on Function Approximation (U Kressel & J Schürmann) Combination of Multiple Classifier Decisions for Optical Character Recognition (L Lam et al.) Segmentation-Based Cursive Handwriting Recognition (M Shridhar & F Kimura) Handwritten Word Recognition Using Hidden Markov Models (A Kundu) Techniques for Improving OCR Results (A Dengel et al.) Multilingual Document Recognition (A L

Spitz)Arabic Character Recognition (A Amin)Interpretation of Engineering Drawings (K Tombre & D Dori)Automatic Reading of Music Notation (D Bainbridge & N Carter)Algorithms for Automatic Signature Verification (G Dimauro et al.)Automatic Reading of Braille Documents (A Antonacopoulos)Information Retrieval and OCR (K Taghva et al.)Benchmarking DIA Systems (T A Nartker et al.)and other papers Readership: Computer scientists and engineers. keywords: *Document Analysis Systems* Nov 16 2019 The 1st International Workshop on Document Analysis Systems (DAS94,) is a full workshop on research and development of systems for the analysis of document images. This volume will be of use to academic and industrial researchers, end-users, students and principal investigators. Contents:Palace: A Multilingual Document Recognition System (A L Spitz & M Ozaki)Programmable

Contextual Analysis (D J Ittner & H S Baird)Using Consensus Sequence Voting to Correct OCR Errors (D Lopresti & J Zhou)Integration of Contextual Knowledge Sources into a Blackboard-Based Text Recognition System (R Sennhauser)Recognition of Handwritten Responses on US Census Forms (T M Breuel)Knowledge Organization and Interpretation Process in Engineering Drawing Interpretation (P Vaxiviere & K Tombre)Processing Imprecise and Structural Distorted Line Drawings by an Adaptable Drawing Interpretation Kernel (B Pasternak)Document Image Matching and Retrieval with Multiple Distortion-Invariant Descriptors (J J Hull)Off-Line Interpretation and Execution of Corrections on Text Documents (D Möri & H Bunke)Document Analysis and Learning (J Hull & T Bayer)Form Recognition (T Caesar & R G Casey)and other papers Readership: Computer scientists. keywords: **Evidence Based Fuzzy Single Document Analysis** Jun 16

2022 Human beings can extract meaningful information from single documents and can even summarize them depending on their interest. Computers on the other hand are used in increasingly large number of documents to process them. Even with vast number of documents we are drowning in, there will always be need of important documents which occur singly or in small numbers. For example, it is unlikely that a statistically significant number of airplanes will collide with tall buildings. So, to analyze and extract significant information from reports or documents related to this kind of scenario, it requires subjective analysis of data.

*Executive Briefing* Feb 12 2022

This new executive briefing describes the technical methods and systems used for document processing of text and graphical images. These methods evolved from the fields of digital signal processing, digital image processing, and pattern recognition. The briefing gives

executives and managers vital information on document processing approaches and details how these methods apply in different situations. If you are an executive, manager, or other decision maker whose business requires acquaintance or understanding of document processing, this book will prove to be a valuable asset. The briefing identifies major problem areas, describes multiple methods that you can apply to each problem, and discusses their advantages and disadvantages. It includes both technology descriptions as well as references to technical papers that detail the techniques.

### **Digital Document**

**Processing** May 23 2020 This book brings all the major and frontier topics in the field of document analysis together into a single volume, creating a unique reference source that will be invaluable to a large audience of researchers, lecturers and students working in this field. With chapters written by some of the most distinguished researchers

active in this field, this book addresses recent advances in digital document processing research and development.

Document Analysis and Recognition - ICDAR 2021 Jul 25 2020 This four-volume set of LNCS 12821, LNCS 12822, LNCS 12823 and LNCS 12824, constitutes the refereed proceedings of the 16th International Conference on Document Analysis and Recognition, ICDAR 2021, held in Lausanne, Switzerland in September 2021. The 182 full papers were carefully reviewed and selected from 340 submissions, and are presented with 13 competition reports. The papers are organized into the following topical sections: historical document analysis, document analysis systems, handwriting recognition, scene text detection and recognition, document image processing, natural language processing (NLP) for document understanding, and graphics, diagram and math recognition.

**Handwritten Historical Document Analysis, Recognition, And Retrieval -**

### **State Of The Art And Future Trends**

Oct 28 2020 In recent years, libraries and archives all around the world have increased their efforts to digitize historical manuscripts. To integrate the manuscripts into digital libraries, pattern recognition and machine learning methods are needed to extract and index the contents of the scanned images. The unique compendium describes the outcome of the HisDoc research project, a pioneering attempt to study the whole processing chain of layout analysis, handwriting recognition, and retrieval of historical manuscripts. This description is complemented with an overview of other related research projects, in order to convey the current state of the art in the field and outline future trends. This must-have volume is a relevant reference work for librarians, archivists and computer scientists.

Document Analysis Systems II May 15 2022 This book provides an overview of the

state of the art in research and development of systems for document image analysis. Topics covered include a variety of systems and architectures for processing document images as well as methods for converting those images into formats that can be manipulated by a computer. The chapters are written by recognized experts in the field and describe Systems and Architectures, Recognition Techniques, Graphics Analysis, Document Image Retrieval, and World Wide Web Applications.

### **Foundations of Forensic Document Analysis**

Dec 10 2021 Forensic document examination is a long established specialty and its practitioners have regularly been shown to have acquired skills that enable them to assist the judicial process. This book, aimed primarily at students studying forensic science and document examination in particular, introduces all of the essential ideas that are to be found in the work of the forensic document examiner in a concise and straightforward

way. Each examination type is described not only in terms of its procedural basis but also the science and reasoning that underpins it. The reader will be able to relate the different kinds of interpretation skills used by the document examiner to those used in other forensic disciplines. This book will be an invaluable text for all students taking courses in Forensic Science or related subjects. The book will also be a useful reference for researchers new to this field or practitioners looking for an accessible overview. The author will be adding new references that are relevant as they are published and some more worked examples from time to time. Please visit [qdbook.blogspot.co.uk](http://qdbook.blogspot.co.uk) for more details.

### **The Practice of Qualitative Data Analysis**

Jul 05 2021 This book provides ten case studies with concise real-world examples illustrating how MAXQDA is used in practice. In each research example, the authors present their way of using MAXQDA, addressing a

variety of practical questions, such as how the coding system was developed, how coded documents were analyzed, what tools were used, and how those tools informed the results. Embedded in the context of each research example, readers can follow analytical processes step-by-step and gain insights into efficient ways to use MAXQDA. Readers can benefit from this book in several ways: - Get inspirations and solutions for their own projects - Avoid pitfalls by considering the lessons learned from each author presented at the end of each chapter - Use the examples in teaching Audience: - All researchers who want to get to learn the potential of qualitative data analysis with MAXQDA - All users of MAXQDA who want to expand their knowledge and skills, no matter if they are novices or experts

### Machine Learning in Document Analysis and Recognition

Aug 18 2022 The objective of Document Analysis and Recognition (DAR) is to

recognize the text and graphical components of a document and to extract information. With first papers dating back to the 1960's, DAR is a mature but still growing research field with consolidated and known techniques. Optical Character Recognition (OCR) engines are some of the most widely recognized products of the research in this field, while broader DAR techniques are nowadays studied and applied to other industrial and office automation systems. In the machine learning community, one of the most widely known research problems addressed in DAR is recognition of unconstrained handwritten characters which has been frequently used in the past as a benchmark for evaluating machine learning algorithms, especially supervised classifiers. However, developing a DAR system is a complex engineering task that involves the integration of multiple techniques into an organic framework. A reader may feel that the use of machine learning algorithms is

not appropriate for other DAR tasks than character recognition. On the contrary, such algorithms have been massively used for nearly all the tasks in DAR. With large emphasis being devoted to character recognition and word recognition, other tasks such as pre-processing, layout analysis, character segmentation, and signature verification have also benefited much from machine learning algorithms.

### **Camera-Based Document Analysis and Recognition**

Aug 26 2020 This book constitutes the thoroughly refereed post-workshop proceedings of the 5th International Workshop on Camera-Based Document Analysis and Recognition, CBDAR 2013, held in Washington, DC, USA, in August 2013. The 14 revised full papers presented were carefully selected during two rounds of reviewing and improvement from numerous original submissions. Intended to give a snapshot of the state-of-the-art research in the field

of camera based document analysis and recognition, the papers are organized in topical sections on text detection and recognition in scene images and camera-based systems. [Document Analysis Guide for MicroStrategy 9.5](#) Apr 02 2021 The Document Analysis Guide provides instructions for business analysts to execute and analyze a document in MicroStrategy Desktop and MicroStrategy Web, building on basic concepts about projects and reports presented in the MicroStrategy Basic Reporting Guide.

**Web Document Analysis** Nov 21 2022 This book provides the first comprehensive look at the emerging field of web document analysis. It sets the scene in this new field by combining state-of-the-art reviews of challenges and opportunities with research papers by leading researchers. Readers will find in-depth discussions on the many diverse and interdisciplinary areas within the field, including web image processing, applications of machine

learning and graph theories for content extraction and web mining, adaptive web content delivery, multimedia document modeling and human interactive proofs for web security. Contents: Content Extraction and Web Mining; Document Analysis for Adaptive Content Delivery; Table Understanding on the Web; Web Image Analysis and Retrieval; New Opportunities. Readership: Graduate students and researchers in document-analysis and web communities.

### **Document Analysis Systems**

Mar 13 2022 This book constitutes the refereed proceedings of the 15th IAPR International Workshop on Document Analysis Systems, DAS 2022, held in La Rochelle, France, in May 2022. The full papers presented were carefully reviewed and selected from numerous submissions addressing key techniques of document analysis.

Proceedings of the Fifth International Conference on Document Analysis and Recognition : September 20-22, 1999, Bangalore, India Mar 21

2020 Proceedings of the September 1999 conference on various aspects of document analysis and recognition. Following the keynote address on character and document research in the open mind initiative, 195 oral and poster contributions discuss topics including multimedia document processing; character recognition; document image processing; applications, checks, forms and music; DAS, electronic documents, and document segmentation; character recognition and classification; information retrieval; postal automation; document analysis systems; performance evaluation; and handwriting, font, graphics, word, Oriental character, and Indian languages recognition. Lacks a subject index.

Annotation copyrighted by Book News, Inc., Portland, OR. *The Encyclopedia of Research Methods in Criminology and Criminal Justice, 2 Volume Set* Oct 16 2019 The Encyclopedia of RESEARCH METHODS IN CRIMINOLOGY & CRIMINAL JUSTICE The most

comprehensive reference work on research designs and methods in criminology and criminal justice This Encyclopedia of Research Methods in Criminology and Criminal Justice offers a comprehensive survey of research methodologies and statistical techniques that are popular in criminology and criminal justice systems across the globe. With contributions from leading scholars and practitioners in the field, it offers a clear insight into the techniques that are currently in use to answer the pressing questions in criminology and criminal justice. The Encyclopedia contains essential information from a diverse pool of authors about research designs grounded in both qualitative and quantitative approaches. It includes information on popular datasets and leading resources of government statistics. In addition, the contributors cover a wide range of topics such as: the most current research on the link between guns and crime, rational choice theory,

and the use of technology like geospatial mapping as a crime reduction tool. This invaluable reference work: Offers a comprehensive survey of international research designs, methods, and statistical techniques Includes contributions from leading figures in the field Contains data on criminology and criminal justice from Cambridge to Chicago Presents information on capital punishment, domestic violence, crime science, and much more Helps us to better understand, explain, and prevent crime Written for undergraduate students, graduate students, and researchers, The Encyclopedia of Research Methods in Criminology and Criminal Justice is the first reference work of its kind to offer a comprehensive review of this important topic. [Handbook of Emergent Methods](#) Jan 31 2021 Social researchers increasingly find themselves looking beyond conventional methods to address complex research questions. The Handbook of

Emergent Methods is the first book to comprehensively examine emergent qualitative and quantitative theories and methods across the social and behavioral sciences. Providing scholars and students with a way to retool their research choices, the volume presents cutting-edge approaches to data collection, analysis, and representation. Leading researchers describe alternative uses of traditional quantitative and qualitative tools, innovative hybrid or mixed methods; and new techniques facilitated by technological advances. Consistently formatted chapters explore the strengths and limitations of each method for studying different types of research questions and offer practical, in-depth examples. *Document Analysis Guide for for MicroStrategy 9. 3. 1* Jul 17 2022

*Document Analysis Guide for for MicroStrategy 9. 3* Oct 08 2021

### **Document Image Analysis**

Jun 23 2020 Interest in the automatic processing and

analysis of document images has been rapidly increasing during the past few years. This book addresses the different subfields of document image analysis, including preprocessing and segmentation, form processing, handwriting recognition, line drawing and map processing, and contextual processing. Contents: Preface (H Bunke et al.) A New Parallel Thinning Algorithm (Y Y Zhang & P S P Wang) Background Structure in Document Images (H S Baird) Analysis of Form Images (D Wang & S N Srihari) Model-Based Analysis and Understanding of Check Forms (T M Ha & H Bunke) Document Structures: A Survey (Y Y Tang & C Y Suen) Automatic Input of Logic Diagrams by Recognizing Loop-Symbols and Rectilinear Connections (S H Kim & J H Kim) Syntactic Analysis of Technical Drawing Dimensions (S Collin & D Colnet) Recognition of Elevation Value in Topographic Maps by Multi-Angled Parallelism (H Yamada et al.) Character Recognition by Signature

Approximation (N Papamarkos et al.)An Adaptive Modular Neural Network with Application to Unconstrained Character Recognition (L Mui et al.)A Model-Based Split-and-Merge Method for Character String Recognition (H Nishida & S Mori)A Robust Stroke Extraction Method for Handwritten Chinese Characters (H-D Chang & J-F Wang)Handprinted Chinese Character Recognition Using Probability Distribution Feature (T F Li & S S Yu)An Algorithm for Matching OCR-Generated Text Strings (S V Rice et al.) Readership: Computer scientists. keywords: Document Analysis Guide for for MicroStrategy 9.2.1.m Jan 11 2022 Document Analysis Systems Aug 06 2021 *Document Analysis Systems V* Nov 28 2020 This book constitutes the refereed proceedings of the 5th International Workshop on Document Analysis Systems, DAS 2002, held in Princeton, NJ, USA in August 2002 with sponsorship from IAPR.The 44

revised full papers presented together with 14 short papers were carefully reviewed and selected for inclusion in the book. All current issues in document analysis systems are addressed. The papers are organized in topical sections on OCR features and systems, handwriting recognition, layout analysis, classifiers and learning, tables and forms, text extraction, indexing and retrieval, document engineering, and new applications.

Doing Conversation, Discourse and Document Analysis Sep 07 2021 Introducing the theory and practice of conversation, discourse and document analysis, this book proves how useful these methods are in addressing key questions in the social sciences. A true masterclass on practical issues such as generating an archive, transcribing video material, and analyzing discourses using a full range of documentary and verbal data. It is the essential guide to exploring the rich rewards of working with text and talk.

**Document Analysis** Dec 18 2019 The famous Lindbergh kidnapping in the 1930s was solved, in part, through a detailed analysis of the kidnapper's handwriting. Other criminal cases, such as selling phony manuscripts, forgery, and fraud can be broken with detailed analyses of handwriting, typewriting, photocopied documents, and the inks and papers used on documents. The science of analyzing documents has been growing for more than a century. In this book, readers will learn how to document analysis has helped solve various crimes, from kidnappings and famous forgeries, to bombings and other violent crimes. Readers will also see how document examiners present their findings in court. Crime leaves a paper trail—and document analysis provides the techniques for following that trail.

**Document Analysis Systems** Sep 26 2020 This book constitutes the refereed proceedings of the 14th IAPR

International Workshop on Document Analysis Systems, DAS 2020, held in Wuhan, China, in July 2020. The 40 full papers presented in this book were carefully reviewed and selected from 57 submissions. The papers are grouped in the following topical sections: character and text recognition; document image processing; segmentation and layout analysis; word embedding and spotting; text detection; and font design and classification. Due to the Corona pandemic the conference was held as a virtual event .

*Document Analysis And Text Recognition: Benchmarking State-of-the-art Systems* Mar 01 2021 The compendium presents the latest results of the most prominent competitions held in the field of Document Analysis and d104 Recognition. It includes a description of the participating systems and the underlying methods on one hand and the datasets used together with evaluation metrics on the other hand. This volume also demonstrates with examples,

how to organize a competition and how to make it successful. It will be an indispensable handbook to the document image analysis community. Contents: Logical Structure and Segmentation: Logical Structure Extraction from Digitized Books (Antoine Doucet) Handwriting Segmentation (Nikolaos Stamatopoulos, Georgios Louloudis, and Basilis Gatos) Digits and Mathematical Expressions: Handwritten Digit and Digit String Recognition (Markus Diem, Stefan Fiel, and Florian Kleber) Handwritten Mathematical Expressions (Harold Mouchère, Christian Viard-Gaudin, Richard Zanibi, and Utpal Garain) Writer Identification and Signature Verification: Writer Identification (Georgios Louloudis, Nikolaos Stamatopoulos, and Basilis Gatos) Arabic Writer Identification Using AHTID/MW and KHATT Database (Fouad Slimane and Sameh Awaida) Signature Verification: Recent Developments and Perspectives

(Muhammad Imran Malik, Sheraz Ahmed, Andreas Dengel, and Marcus Liwicki) d104 Recognition: Handwritten d104 Recognition Competitions With the tranScriptorium Dataset (Joan Andreu Sánchez, Verónica Romero, Alejandro H Toselli, and Enrique Vidal) Multifont and Multisize Low-resolution Arabic d104 Recognition Using APTI Database (Fouad Slimane and Christine Vanoirbeek) Readership: Researchers, academics, professionals and graduate students in pattern recognition/image analysis, neural networks, and innovation/technology. Keywords: Document Analysis; Digitisation; Character Recognition; Mathematical Expression Recognition; Digit Recognition; Arabic Documents; Handwriting Recognition; Performance Evaluation; Benchmarking; Competitions Review: 0  
**Document Analysis Systems VI** Oct 20 2022  
This volume contains papers selected for presentation at the 6th IAPR Workshop on Document

Analysis Systems (DAS 2004) held during September 8-10, 2004 at the University of Florence, Italy. Several papers represent the state of the art in a broad range of "traditional" topics such as layout analysis, applications to graphics recognition, and handwritten documents. Other contributions address the description of complete working systems, which is one of the strengths of this workshop. Some papers extend the application domains to other media, like the processing of Internet documents. The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents, a taste which frequently requires the analysis of color documents. A total of 17 papers are associated with these topics, whereas two years ago (in DAS 2002) only a couple of papers dealt with these problems. In our view there are three main reasons for this new wave in the DAS community. From the scienti?c

point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

### **Doing Conversation, Discourse and Document Analysis** Dec 22 2022

Introducing the theory and practice of conversation, discourse and document analysis, this text demonstrates the usefulness of these methods in addressing key questions in the social sciences. Tim Rapley also provides an overview of the particular challenges involved in collecting and analysing data from these sources.
