Leadership in Science and Technology: A Reference Handbook Nov 11 2021 "This 2-volume set within the SAGE Reference Series on Leadership tackles issues relevant to leadership in the realm of science and technology. To encompass the key topics in this arena, this handbook features 100 topics arranged under eight headings. Volume 1 concentrates on general principles of science and technology leadership and includes sections on social-scientific perspectives on S&T leadership; key scientific concepts about leading and innovating in S&T; characteristics of S&T leaders and their environments; and strategies, tactics, and tools of S&T leadership. Volume 2 provides case studies of leadership in S&T, with sections considering leadership in informal communities of scientists and engineers; leadership in government projects and research initiatives; leadership in industry research, development, and innovation; and finally, leadership in education and university-based research. By focusing on key topics within 100 brief chapters, this unprecedented reference resource offers students more detailed information and depth of discussion than typically found in an encyclopedia entry but not as much jargon, detail or density as in a journal article or a research handbook chapter. Entries are written in language and style that is broadly accessible, and each is followed by cross-references and a brief bibliography and further readings. A detailed index and an online version of the work enhances accessibility for today's student audience"--Provided by publisher.

Christopher Williams Mar 23 2020 "Chronologically examining the nature of his art within the context of mass media and photojournalism, this handsome volume charts the thirty-year career of the artist and photographer Christopher Williams (b. 1956). Featuring 100 color illustrations, the book also includes a trio of essays by authors Mark Godfrey, Roxana Marcoci, and Matthew S. Witkovsky that demonstrate how Williams, with high craft and a critical eye, deliberately engages yet reinterprets the conventions of photojournalism, picture archives, and commercial imagery through uncanny mimicry. Committed to the history of photography as a medium of art and intellectual inquiry, Williams's current series tackles the interplay of photography and cinema, upending viewer expectations and the role of spectacle"--

Nautilus Legends, books 1-3 Feb 26 2023 Sea monsters have no place in modern science. Try telling them that. Corrie loves being a marine biologist, even if research money is a constant struggle. But studying sea anemones isn't as ground-breaking as the mermaid she saw. She can't tell anyone—one slip of her overactive tongue, and Corrie's career would tank faster than a submarine. When mysterious free diver Zeballos offers her his ship to collect samples, cash-strapped Corrie eagerly sets sail. A bizarre fish jumps over the bow, hinting at answers to Corrie's tantalizing questions, but she's not the only hunter. A desperate drug dealer is hellbent on exploiting the rare sea creatures, and he'll do anything to stop Corrie from stealing his product. Together, Corrie and Zeballos navigate dangerous waters, dodge ruthless fishermen, and dive into uncharted worlds. The further they go, the deeper the mysteries. If they don't stop the drug dealer, then neither Corrie nor Zeballos will get the answers they both desperately seek. In the end, it may not matter who finds the elusive fish... Because disturbed nightmares hunt from the depths below. Read the first three books of the Nautilus Legends, a twist on your favorite myths of mermaids, sirens, the Kraken, and many more. Fans of Clara Coulson, BR Kingsolver, and Linsey Hall will love this adventurous urban fantasy with a salty flavor.

Righting Software Feb 20 2020 Right Your Software and Transform Your Career Righting Software presents the proven, structured, and highly engineered approach to software design that renowned architect Juval Löwy has practiced and taught around the world. Although companies of every kind have successfully implemented his original design ideas across hundreds of systems, these insights have never before appeared in print. Based on first principles in software engineering and a comprehensive set of matching tools and techniques, Löwy's methodology integrates system design and project design. First, he describes the primary area where many software architects fail and shows how to decompose a system into smaller building blocks or services, based on volatility. Next, he shows how to flow an effective project design from the system design; how to accurately calculate the project duration, cost, and risk; and how to devise multiple execution options. The method and principles in Righting Software apply regardless of your project and company size, technology, platform, or industry. Löwy starts the reader on a journey that addresses the critical challenges of software development today by righting software systems and projects as well as careers—and possibly the software industry as a whole. Software professionals, architects, project leads, or managers at any stage of their career will benefit greatly from this book, which provides guidance and knowledge that would otherwise take decades and many projects to acquire. Register your book for convenient access to downloads, updates, and/or corrections as they become available. See inside book for details.

New York Magazine Dec 20 2019 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

The Complete Guide to Letting Property Nov 23 2022 "an invaluable book . . . the author herself is a landlord and the text speaks from experience." —the small landlord's association that this best-selling book is now in its sixth edition proves what a popular choice letting property has become. now that banks and building societies offer buy-to-let schemes, the floodgates have opened to thousands of potential landlords: 12% of all housing stock is now in the private renting sector. this fully revised and expanded edition provides reliable advice on all aspects of becoming a landlord. it advises on the pitfalls and the advantages, as well as how to choose the right type of property and how to calculate the finances. the complete guide to letting property also contains a wealth of new information on: landlord's associations * buying a long way from home * how to pick a good agent * negotiating with your tenant * taking non-paying tenants to court on-line * lodgers * buying property for children while they are students * adapting basements, lofts and garden rooms to make them suitable for letting interspersed with case studies and tips from experts, this book is a must read for anyone considering letting a property.

Women in Sunlight Jan 01 2021 By the bestselling author of *Under the Tuscan Sun*, and written with Frances Mayes's trademark warmth, heart, and delicious descriptions of place, food, and friendship, *Women in Sunlight* is the story of four lives that change over the course of one exceptional year in Italy. The new novel from the bestselling author of *Under the Tuscan Sun* tells the story of four American women who become unexpected friends when they move to a beautiful villa in Tuscany. She watches from her terrazza as the three American women carry their luggage into the stone villa down the hill. Who are they, and what brings them to this Tuscan village so far from home? Kit Raine, an American writer living in the small Italian town of San Rocco, is working on a biography of her close friend, the novelist Margaret Merrill. But her work is waylaid by the arrival of three women - Julia, Camille and Susan - all of whom have recently formed a friendship that will uproot them completely and redirect their lives. For Susan, the most fearless of the three, has enticed them to subvert expectations of a staid retirement in the States by taking on the lease of a big, beautiful house in Tuscany . . . Though novices in a foreign culture, their renewed sense of adventure imbues each of them with a bright sense of bravery, a spirited lust for life, and a fierce determination to thrive. With Kit's friendship and guidance, the three friends launch themselves into Italian life, pursuing passions long-forgotten - with drastic and unforeseeable results. 'As in *Under the Tuscan Sun*, Mayes's writing about Italy is the next best thing to a plane ticket' People 'Frances Mayes is back under the Tuscan sun, and the forecast for readers is bright ... she brings the magic of Tuscany to life once again in her new novel' USA Today 'The beloved Frances Mayes seems to own the Italian sun. Her first Italian-set novel is a lovely and intimate journey of friendship, loss, and hope set in the eternal beauty of Tuscan countryside' Adriana Trigiani

Culinary Artistry Jul 19 2022 "In *Culinary Artistry*...Dornenburg and Page provide food and flavor pairings as a kind of steppingstone for the recipe-dependent cook...Their hope is that once you know the scales, you will be able to compose a symphony." --Molly O'Neil in *The New York Times Magazine*. For anyone who believes in the potential for artistry in the realm of food, *Culinary Artistry* is a must-read. This is the first book to examine the creative process of culinary composition as it explores the intersection of food, imagination, and taste. Through interviews with more than 30 of America's leading chefs including Rick Bayless, Daniel Boulud, Gray Kunz, Jean-Louis Palladin, Jeremiah Tower, and Alice Waters the authors reveal what defines "culinary artists," how and where they find their inspiration, and how they translate that vision to the plate. Through recipes and reminiscences, chefs discuss how they select and pair ingredients, and how flavors are combined into dishes, dishes into menus, and menus into bodies of work that eventually comprise their cuisines.

The Noetic Universe Nov 18 2019 The publication of Dan Brown's latest international bestseller, *The Lost Symbol*, introduced the world to a fascinating new concept: 'noetics'. Now, in this rigorously reasoned manifesto, Dean Radin, Senior Scientist at the Institute for Noetic Sciences, explains the new science of noetics and how this exciting new field of research is set to change the way we view the world forever. The *Noetic Universe* provides astonishing answers to universal questions by unveiling persuasive empirical evidence for the existence of psychic phenomena - from telepathy and clairvoyance to jinxes and prayer. Dean Radin shatters the myths that surround parapsychology, revealing the extent to which corporations, governments and academia have embraced it, and exploring what the effects will be when - inevitably - mainstream science and society embrace it as well.

History of Brighthelmston Jul 07 2021

Captain Nemo Apr 16 2022 The 9/11 attacks on America marked the beginning of a new era in history, one in which everyday safety is no longer taken for granted. But the forces that triggered those horrific actions have been in place for years -- and experts estimate that as many as 500 terrorist cells exist in America today. In *The Cell*, John Miller and Michael Stone follow the key agents and detectives who know their whereabouts. Listeners will join in the step-by-step process of identifying and linking suspects, as well as learn the politics and pressures, the magnitude and the feel of the greatest manhunt in the history of the world.

On Pluto: Inside the Mind of Alzheimer's May 17 2022 This is a book about living with Alzheimer's, not dying with it. It is a book about hope, faith, and humor—a prescription far more powerful than the conventional medication available today to fight this disease. Alzheimer's is the sixth leading cause of death in the US—and the only one of these diseases on the rise. More than 5 million Americans have been diagnosed with Alzheimer's or a related dementia; about 35 million people worldwide. Greg O'Brien, an award-winning investigative reporter, has been diagnosed with early-onset Alzheimer's and is one of those faceless numbers. Acting on long-term memory and skill coupled with well-developed journalistic grit, O'Brien decided to tackle the disease and his imminent decline by writing frankly about the journey. O'Brien is a master storyteller. His story is naked, wrenching, and soul searching for a generation and their loved ones about to cross the threshold of this death in slow motion. *On Pluto: Inside the Mind of Alzheimer's* is a trail-blazing roadmap for a generation—both a “how to” for fighting a disease, and a “how not” to give up! From the Trade Paperback edition.

Power with Nature May 05 2021 "Covers renewable energy options for grid-tied and off-grid homeowners, including solar energy (passive and active), wind power, microhydro energy, geothermal heat pumps, solar water heating, biomass heating, backup generators and pumping/storing water. Also examines energy conservation, system sizing/pricing, and tax incentives"--

Nautilus, Beautiful Survivor Jan 25 2023 "Nautilus represents the longest living complex life form on our planet. Since the dawn of civilization it has been, and continues to be, and inspiration for artists, designers and architects. Nautilus has survived whatever the world has thrown at it for more than 500 million years, when dinosaurs and other life forms could not. Now, some believe, it could become extinct within this generation. This book celebrates the long history of nautilus, its impact on our culture and how it still inspires collectors and scientists today."--Publisher information.

Popular Science Feb 02 2021 *Popular Science* gives our readers the information and tools to improve their technology and their world. The core belief that *Popular Science* and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

15 Minutes to Fitness Aug 20 2022 Do you ever feel like a hamster, spinning on a wheel in an endless loop and getting nowhere when it comes to your health and fitness? Are you working out regularly and cutting calories but seeing no real improvements? Does it feel like you will never lose those last 10 or 20 pounds? Or do you feel as if you simply don't have the time required to lose the fat and get into shape? Imagine if you could have the blueprint for the most efficient form of exercise to keep your body healthy and fit and an eating plan to satisfy hunger, taste, and health. Well, now you can. The best part? It will only require 15 minutes of exercise, twice a week, paired with a controlled-carb diet, and on the average, you will lose 10 pounds of fat within five weeks. It's hard to believe, but it works—and 15 Minutes to Fitness:Dr. Ben's SMaRT plan for total Fitness will not only show you how to do it but also explain why it works. If this sounds like just another “new exercise secret,” please be assured that it is most certainly not. The foundation of this program is based

on years of study, observation, and practice, and it has delivered real, measurable results in the overwhelming majority of those who have tried it. Dr. Vincent “Ben” Bocchicchio has spent the last 40 years in the fitness and health field, and as he approaches 70, people are still shocked to hear that he only spends 14 minutes twice a week on working out. But it’s true. With only 7 percent body fat, he is often asked what the secret is and if there's a “magic bullet.” The answer would be that the magic bullet is knowledge. And now with this book you will understand why genetically our bodies require simple and limited exercise exposure and how you can follow this optimal pattern yourself. The fact is that as humans we are hard-wired to exercise our bodies in very specific ways to reap the highest level of health benefits. I will provide the simple scientific argument for why my combination of high intensity exercise and controlled carbohydrate eating is the most effective means for burning fat, so that you can better understand exactly why this works. Exercise and diet are the two most powerful tools available for attaining high levels of health and function, and 15 Minutes to Fitness will show you just how little it actually takes to achieve a maximum response.

Boatowner's Illustrated Electrical Handbook Jan 21 2020 Keep your boat's electrical systems running and reliable “Boatowner’s Illustrated Electrical Handbook is perfect for learning how your boat’s electrical system and much of its equipment works, and it will be an invaluable guide when adding equipment as well. This book needs to be in every boater’s library as a ready reference on how to make effective repairs and modifications that comply with ABYC standards.”—Ed Sherman, Senior Instructor and Curriculum Designer, American Boat and Yacht Council “A definitive technical book that is easy to read. Buy this book and throw out the rest.”—Motorboat & Yachting Whether you take to the sea under power or sail, bounce around the bay in your runabout, or cross oceans in your cruiser, you’ll find everything you need to maintain, repair, and upgrade your boat’s DC and AC electrical systems with this comprehensive and fully illustrated guide. Tackle onboard electrical projects and learn how to: Meet ABYC standards for both DC and AC wiring Install solar- and wind-power systems Add electrical components Prevent corrosion of your electrical system . . . and more

Arrowsmith Apr 23 2020 First published in 1925, 'Arrowsmith' is a novel by American author Sinclair Lewis. It is arguably the earliest major novel to deal with the culture of science. It was written in the period after the reforms of medical education flowing from the Flexner Report on Medical Education in the United States and Canada: A Report to the Carnegie Foundation for the Advancement of Teaching, 1910, which had called on medical schools in the United States to adhere to mainstream science in their teaching and research.

New York Magazine Mar 03 2021 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Natural Language Understanding and Intelligent Applications Nov 30 2020 This book constitutes the joint refereed proceedings of the 5th CCF Conference on Natural Language Processing and Chinese Computing, NLPCC 2016, and the 24th International Conference on Computer Processing of Oriental Languages, ICCPOL 2016, held in Kunming, China, in December 2016. The 48 revised full papers presented together with 41 short papers were carefully reviewed and selected from 216 submissions. The papers cover fundamental research in language computing, multi-lingual access, web mining/text mining, machine learning for NLP, knowledge graph, NLP for social network, as well as applications in language computing.

The League of Extraordinary Gentlemen: The Tempest #1 Jul 27 2020 After an epic twenty-year journey through the entirety of human culture, Alan Moore and Kevin O'Neill conclude both their legendary League of Extraordinary Gentlemen and their equally legendary comic-book careers with the series' spectacular fourth and final volume, "The Tempest." This six-issue miniseries is a celebration of everything comics were, are, and could be. Opening simultaneously in the panic-stricken headquarters of British Military Intelligence, the fabled Ayasha's lost African city of Kor, and the domed citadel of 'We' on the devastated Earth of the year 2996, the dense and yet furiously-paced narrative hurtles like an express locomotive across the fictional globe. This is literally, and literarily, the story to end all stories. Here's how it begins.

Cruising World Jan 13 2022

The Nuclear Environmentalist May 25 2020 This book explains how society will face an energy crisis in the coming decades owing to increasing scarcity of fossil fuels and climate change impacts. It carefully explores this coming crisis and concisely examines all of the major technologies related to energy production (fossil fuels, renewables, and nuclear) and their impacts on our society and environment. The author argues that it is wrong to pit alternatives to fossil fuels against each other and proposes that nuclear energy, although by no means free of problems, can be a viable source of reliable and carbon-free electricity. He concludes by calling for a diversified and rational mix of electricity generation in order to mitigate the effects of the energy crisis. Throughout, the book is spiced with science, history, and anecdotes in a way that ensures rewarding reading without loss of rigor.

Cincinnati Magazine Dec 12 2021 Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Business Transformation Strategies Apr 04 2021 A resource for industry professionals and consultants, this book on corporate strategy lays down the theories and models for revitalizing companies in the face of global recession. It discusses cutting-edge concepts, constructs, paradigms, theories, models, and cases of corporate strategic leadership for bringing about transformation and innovation in companies. It demonstrates that great companies are those that make the leap from ‘good’ results to ‘great’ results and sustain these for at least 15 years; it explores, reviews and analyzes great transformation strategies in this context. Each chapter in the book is appended with transformation exercises that further explicate the concepts.
