"This book is an invaluable window into Bradford and Brandon's creative thinking and summarizes their years of experience. Hopefully it serves as a spark for you just as the authors have done for GoPro." From the foreword by Nicholas Woodman, founder of GoPro The GoPro Karma Drone is the first foldable drone. The announcement was made in December of 2015, but the long-awaited GoPro is not yet up for purchase until October of this year. It is lightweight and easy to use when compared to other drones currently on the market. It is a professional-grade drone that can be used by anyone and comes with its own backpack. In addition, the GoPro Karma drone requires no assembly, simply remove from the backpack, unfold the propeller and you are ready to use. The parts can be easily replaced if damaged and the GoPro Karma is able to stand up to everyday wear- and- tear. Introduces the features of GoPro cameras, explaining how to create and share action-packed photos and videos, including setup, framing shots, and capturing sound, with tips on using the GoPro editing software. GoPro is a manufacturer of cameras, designed to capture stunning photographs and create high quality films. GoPro is also well recognized and highly acclaimed in manufacturing small cameras that can produce quality photos that are similar to the standards of professionals. Their new GoPro Hero 4 Session is expected to do just that but in a much easier and simpler way. The world of technology was pleased to announce the GoPro 4 Silver Camera. This new and innovative digital device is economic friendly and also consumer friendly. The camera is equipped with waterproof capability of up to 131' of water. Its mountable design ensures multipurpose uses; you could not have asked the minds behind this invention to give us something better than that. The camera's digital zoom has the ability to take the center portion of the high resolution sensor image to help enhance the capacity of the zoom; meaning that the existing data is not altered but merely showcased at a lower the resolution, thereby giving an illusion of an enlarged portrait. The GoPro 4 Silver Digital Camera also comes equipped with built-in Wi-Fi and Bluetooth and has the ability to take 12MP at a speed of 30 frames per second. This camera is the first ever created with touch screen capability. This book studies the relationship between pukaras and their surrounding landscape, focusing on the architectural and settlement variability registered in both contexts. It is the outcome of a symposium held at the XIX National Congress of Argentine Archaeology (San Miguel de Tucuman, August 8–12, 2016) entitled, "Pukaras, strategic settlements and dispersed settlements: Political landscapes of the Late Intermediate Period in the Southern Andes." Based on the topics discussed at the event, this book presents nine case studies covering a large geographic area within the Southern Andes (northwestern Argentina, northern Chile and southern Bolivia), and breaking the national barriers that tend to atomize pre-Hispanic landscapes. The respective chapters cover a wide range of themes: from architectural and settlement variability, ways to build and inhabit space, social segmentation and hierarchy; to endemic conflict, analysis of accessibility and visibility, spatiality and temporality of landscapes; as well as new dating. This book goes beyond the Late Intermediate Period (LIP) analyses from the perspective of fortified settlements and material evidence related to war, by placing the focus on how ancient political landscapes were constructed from the relation between the pukaras and other sites as part of the same territory. The methodologies used include pedestrian surveys, photogrammetric surveys with UAVs (unmanned aerial vehicles) or drones, topographic and architectural surveys, excavations of households, ceramic and rock art analysis, and spatial analysis with geographic information systems (GISs). Given the numerous thematic interconnections between the contributions, the Editors have organized the chapters geographically, moving from south to north: from the southern valleys of Catamarca Province in Argentina to Lipez in the southern part of the Bolivian Altiplano, passing through the Calchaqui valleys of Catamarca, the puna and Quebrada de Humahuaca of Jujuy in northwest Argentina and the Antofagasta region in northern Chile. The book provides valuable new theoretical and methodological perspectives on the study of political landscapes of the Late Intermediate Period in the Southern Andes . This book compiles the first part of contributions to the China–Europe

Conference on Geotechnical Engineering held 13.-16. August 2016 in Vienna, Austria. About 400 papers from 35 countries cover virtually all areas of geotechnical engineering and make this conference a truly international event. The contributions are grouped into thirteen special sessions and provide an overview of the geoenvironmental research and practice in China, Europe and the world: · Constitutive model · Micro-macro relationship · Numerical simulation · Laboratory testing · Geotechnical monitoring, instrumentation and field test · Foundation engineering · Underground construction · Environmental geotechnics · New geomaterials and ground improvement · Cold regions geotechnical engineering · Geohazards – risk assessment, mitigation and prevention · Unsaturated soils and energy geotechnics · Geotechnics in transportation, structural and hydraulic Engineering

Ein paar Zutaten und eine Pfanne reichen noch lange nicht aus, um ein köstliches Essen zu zaubern. Genauso wenig reichen eine Kamera und ein Videobearbeitungsprogramm, um spektakuläre Videos zu erstellen. Vielmehr musst du wissen, wie du damit umgehst. Beim Kochen helfen dir Rezepte. Beim Filmen mit der GoPro hilft dir dieses Buch. Du lernst, wie du spektakuläre GoPro-Videos mit System erstellst, einen Haufen Zeit sparst und dabei richtig Spaß hast – auch wenn du bisher noch nicht so ganz zufrieden mit deinen Ergebnissen warst und kaum Erfahrung mit dem Filmen oder der Videobearbeitung hast. Das Buch begleitet dich bei jedem Schritt auf dem Weg zu deinem Wunsch-Video. Die Kapitel sind so aufgebaut, dass du von A bis Z durch den gesamten Prozess der GoPro-Videoerstellung geführt wirst: • die Planung und Vorbereitung • das

Verständnis der Kamera • das Filmen • die Nachbearbeitung Gleichzeitig ermöglicht der Aufbau ein schnelles, gezieltes Nachschlagen der Tipps, die du in deiner Situation gerade brauchst: Welche Einstellung wähle ich? Wie beginne ich mein Video? Wie vermeide ich verwackelte Aufnahmen? Welche Befestigung oder Perspektive eignet sich am besten? Wie hole ich die beste Bildqualität heraus? Wo finde ich gute, passende und legale Musik? Was muss ich überhaupt bei der Videobearbeitung machen? Welche Effekte kann ich wie einbauen? Erspare dir endloses Rumprobieren, zahlreiche Fehlschläge und tonnenweise "papierkorbreifes" Filmmaterial mit diesen bewährten Tipps und Techniken.

Unmanned Aircraft Systems (UAS) are a rapidly evolving technology with an expanding array of diverse applications. In response to the continuing evolution of this technology, this book discusses unmanned aerial vehicles (UAVs) and similar systems, platforms and sensors, as well as exploring some of their environmental applications. It explains how they can be used for mapping, monitoring, and modeling a wide variety of different environmental aspects, and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as s flight duration and distance, safety, and the invasion of privacy etc. Features of the book: Provides necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition, and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the use of technology for small-scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing: UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications, such as conservation, research, and planning. Students and academics in information science, environment and natural resources, geosciences, and geography, will likewise find this comprehensive book a useful and informative resource. This book aims to provide the reader with an insight into the relevance of a section of the economy, which is often referred to as the 'social and solidarity economy' (SSE); and highlight some of the current issues in the field, how they are being addressed and some of their future implications. Using case studies from around the world, this book 'Social and Solidarity Economy: The World's Economy With a Social Face' provides an up-to-date account of the strengths and weaknesses of these initiatives across four continents including issues that have not been researched sufficiently before (e.g. circular economy, social propaganda and its dangers, social enterprise as a panacea for NGOs in developing countries, and 'new' social movements). There is growing interest in SSE initiatives among policymakers, foundations, researchers and academic institutions around the world. Despite this interest, SSE related research remains scarce. There are concerned that SSE initiatives, which contribute significantly to their local communities' development, need to be more widely disseminated amongst the general public. The Social and Solidarity Economy: The World's Economy With a Social Face will help promote the ground-breaking work being done by organisations and individuals but which remain undocumented and help to raise awareness of such initiatives as well as contribute to academia with a critical approach to the sector covering issues that have not been covered much before, such as the circular economy and the dangers of social propaganda. Aimed at researchers, academics and policy makers in the fields of Social Enterprise, CSR, Tourism, International Economics as well as supporting disciplines 'Social and Solidarity Economy: The World's Economy With a Social Face' looks to establish and help define the field. Information technology is revolutionizing healthcare, and the uptake of health information technologies is rising, but scientific research and industrial and governmental support will be needed if these technologies are to be implemented effectively to build capacity at regional, national and global levels. This book, "Improving Usability, Safety and Patient Outcomes with Health Information Technology", presents papers from the Information Technology and Communications in Health conference, ITCH 2019, held in Victoria, Canada from 14 to 17 February 2019. The conference takes a multi-perspective view of what is needed to move technology forward to sustained and widespread use by transitioning research findings and approaches into practice. Topics range from improvements in usability and training and the need for new and improved designs for information systems, user interfaces and interoperable solutions, to governmental policy, mandates, initiatives and the need for regulation. The knowledge and insights gained from the ITCH 2019 conference will surely stimulate fruitful discussions and collaboration to bridge research and practice and improve usability, safety and patient outcomes, and the book will be of interest to all those associated with the development, implementation and delivery of health IT solutions. In the newest entry in Peachpit's popular From Snapshots to Great Shots series, photographer John Carucci shares amazing techniques for creative time-related photography techniques, including long-exposure, time-lapse, and high-speed photography. Carucci starts by reviewing your equipment needs, including filters, image stabilizers (tripods, monopods, beanbags, etc.), software, and more. Next, he explains the basics of long-exposure photography, demonstrating how to effectively capture time in nighttime cityscapes, photos of the night sky, and in brighter light using neutral density filters. Along the way, you'll learn the fundamentals of blurring, shooting in RAW, and balancing flash and ambient light. He then walks through the essentials of time-lapse photography: how to regulate your camera's motion, determine the best duration to use, and use software to perfect your images. Carucci's time-lapse section is complemented with a complete online video tutorial on capturing effective time-lapse sequences. You'll also find expert coverage of high-speed photography, including choosing shutter speed, stopping action with flash, shooting sports, and more. Carucci concludes by helping you develop and perfect your own aesthetic, with tips on properly framing your scenes, creative composition, and effective use of color and tone. Time Lapse, Long Exposure, and Other Tricks of Time features beautiful full-color images, clear design, and John Carucci's friendly, knowledgeable voice. It's a pleasure to learn from - and if you've ever wanted to master any of these techniques, it's the guide you've been waiting for. Build a custom multirotor aircraft! Build Your Own Quadcopter: Power Up Your Designs with the Parallax Elev-8 features step-by-step assembly plans and experiments that will have you launching fully functioning quadcopters in no time. Discover how to connect Elev-8 components,

program the microcontroller, use GPS, and safely fly your quadcopter. This fun, do-it-yourself guide fuels your creativity with ideas for radical enhancements, including return-to-home functionality, formation flying, and even artificial intelligence! Understand the principles that govern how quadcopters fly Explore the parts included in your Parallax Elev-8 kit Follow illustrated instructions and assemble a basic 'copter Connect the Parallax chip to a PC and write Spin and C programs Build radio-controlled systems that minimize interference Add GPS and track your aircraft through Google Earth Beam flight information to smartphones with WiFi and XBee technology Mount cameras and stream real-time video back to the ground Train to safely operate a quadcopter using flight simulation software This book focuses on small flying drones and their applications in conducting geographic surveys. Scholars and professionals will discover the potential of this tool, and hopefully develop a conceptual and methodological framework for doing the following things: a) Translate their data acquisition needs into specifications. (b) Use the developed specifications to choose the best accessible configuration for their drones, and (c) Design and organize effective and low-cost field deployment and flight operations by integrating technical aspects with regulatory and research requirements. Readers can apply this knowledge to work in cartography, environmental monitoring and analysis, land-use studies and landscape archaeology. Particular attention is also given to the reasons why a drone can dramatically boost a geographer's capability to understand geographic phenomena both from hard-science and humanities-oriented approach. This book explores the understanding, description, and measurement of the physical, sensory, social, and emotional features of motorcycle and bicycle journey experiences in tourism. Novel insights are presented from an original case study of these forms of tourism in the Sella Pass, a panoramic road close to the Dolomites UNESCO World Heritage Site. A comprehensive mixed-methods strategy was employed for this research, with concurrent use of quantitative and qualitative methods including documentation and secondary data analysis, mobile video ethnography, and emotion measurement. The aim was to create a holistic knowledge of the features of journey experiences and a new definition of the mobility space as a perceptual space. The book is significant in that it is among the first studies to explore the concept of journey experiences and to develop an interdisciplinary theoretical foundation of mobility spaces. It offers a comprehensive understanding and a benchmarking of the features of motorcycling and cycling journey experiences, a deeper market knowledge on motorcycling and cycling tourists, and a set of tools, techniques, and recommendations for future research on tourist experiences. Ich habe zwar großen Respekt, aber bin der Meinung, dass man sich immer seinen Ängsten stellen sollte. Davon werde ich noch meinen Kindern erzählen können, dass ich einer von den Dschungelcamp-Testern 2015 war. Ist doch irre, oder?", erzählt Schafhauser mit stolzem Lächeln. Passauer Wochenblatt 13.01.2015 Lagoon Environments Around the World - A Scientific Perspective covers a wide range of topics. Typically bordering between land and sea, lagoons are among the most diversely utilized waterways on the planet. Lagoons are extremely important environments socio-economically, and their usage places ever increasing stress on these very sensitive aquatic regions. The effective management of shallow aquatic environments requires a detailed scientific understanding of the various contributory natural processes. This has both environmental and economic implications, especially where there is any anthropogenic involvement. This book draws on international scientific research to examine the following lagoon related issues: classification, circulation hydrodynamics, ecosystems, sedimentation, anthropogenic stresses, and response to extreme events. The research was carried out by researchers who specialize in shallow water processes and related issues. Die verschiedenen Editionen des beliebten Alleskönners im Porträt Schritt für Schritt von der Idee über die Aufnahme bis hin zu Videoschnitt, Musikuntermalung und Präsentation Mit Bildbeispielen und Infos zu den unterschiedlichen Einsatzmöglichkeiten Kaum ein anderes Kamerasystem hat in den letzten Jahren für so viel Furore gesorgt wie die GoPro, denn mit den kleinen handlichen und robusten Kameras können spielend leicht qualitativ hochwertige Aufnahmen von und in extremen Situationen gemacht werden. Die Autoren Georg Frömelt und Benjamin Grna zeigen Ihnen in diesem Buch die Unterschiede der verschiedenen GoPro-Modelle und deren Möglichkeiten in Bezug auf Foto, Film, Reihenaufnahme und Timelapse-Video. Sie erklären anhand von Beispielen, welches Zubehör es gibt und wann der Gebrauch von Stativ, Filter, Mikrofon & Co. sinnvoll ist. Faszinierende Bilder demonstrieren, wie die GoPro-Kamera »in Action« am besten eingesetzt werden kann. Dabei demonstrieren sie die beinahe unendlichen Möglichkeiten der GoPro und geben Tipps und Tricks aus der Praxis. Abschließend gehen die Autoren auf die Nachbearbeitung der Bilder und Videos sowie die Präsentation der Ergebnisse im Internet ein.
