This book can help your child by providing a whole year of ready to go activities and support on key Mathematics topics which will be being taught in school from 2014. Did you know that children in Year 6 now need to; read, write, order and compare numbers up to 10 000 000; use the formal written methods of long multiplication and long division; recognise when it is possible to use formulae for area and volume of shapes? * Workbooks for home learning * Linked directly to what your children will be learning in school * A linked website

provides additional activities, answers and support for parents * Developed by teachers to ensure the best possible support for the new 2014 National Curriculum. Developed from a first-year graduate course in algebraic topology, this text is an informal introduction to some of the main ideas of contemporary homotopy and cohomology theory. The materials are structured around four core areas: de Rham theory, the Cech-de Rham complex, spectral sequences, and characteristic classes. By using the de Rham theory of differential forms as a prototype of cohomology, the machineries of algebraic topology are made easier to assimilate. With its stress on concreteness, motivation, and readability, this book is equally suitable for self-study and as a one-semester course in topology. much new material, this new edition preserves
the general character of the book in providing a
collection of solutions of the equations of
diffusion and describing how these solutions
may be obtained. This book is intended to help
candidates prepare for entrance examinations in
mathematics and scientific subjects, including
STEP (Sixth Term Examination Paper). STEP is

an examination used by Cambridge colleges as
the basis for conditional offers. They are also
used by Warwick University, and many other
mathematics departments recommend that their
applicants practice on the past papers even if
they do not take the examination. Advanced
Problems in Mathematics is recommended as
preparation for any undergraduate mathematics
course, even for students who do not plan to
take the Sixth Term Examination Paper. The
questions analysed in this book are all based on
recent STEP questions selected to address the
syllabus for Papers I and II, which is the A-level
core (i.e. C1 to C4) with a few additions. Each
question is followed by a comment and a full
solution. The comments direct the reader's
attention to key points and put the question in
its true mathematical context. The solutions
point students to the methodology required to
address advanced mathematical problems
critically and independently. This book is a must
read for any student wishing to apply to

scientific subjects at university level and for anybody interested in advanced mathematics. A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the OCR J560 GCSE Mathematics Higher tier specification for first teaching from 2015, our Homework Book is an ideal companion to the OCR Higher tier Student Book and can be used as a standalone resource. With exercises that correspond to each section of the Student Book, it offers a wealth of additional questions for practice and consolidation. Our Homework Books contain a breadth and depth of questions covering a variety of skills, including problem-solving and mathematical reasoning, as well as extensive drill questions. Answers to all questions are available free on the Cambridge University Press UK Schools website.
