The wristwatch is the only jewellery that most men will wear, although many would not want to call it that. A watch may be a practical device for the sole purpose of telling the time as accurately as possible, a complicated machine, a wearable design object, or a status symbol. Some watch wearers, like scuba divers or pilots, rely on their timepieces for safety and survival. Gene Stone's *The Watch* covers all these things and more. It ranges over the world of watches without prejudice, mixing the old with the new, and the expensive with the economical. It introduces the fifty major brands that any watch collector must be familiar with. Essential wisdom on buying, collecting, maintaining and wearing

watches is provided. And an encyclopedic glossary offers a crash course in watch lore. Best of all are the more than 500 photographs of terrific watches, including remarkable details of dials and movements, and selected for their beauty and diversity from collections around the world. The authors of this book are neither watchmakers nor specific watch specialists, just dedicated watch collectors. A book for the friends of watches and a guide for the collector or the possible collector-to-be, giving some advice and guidelines, certainly also expressing very subjective opinions. Specific subjects of interest from the multi-faceted mosaic of time, watches and watchmaking as a whole: collecting watches, watches and time, the quartz crisis, the revival of mechanic watches, clocking of watches and the corresponding amplitudes from the pendulum to the atomic clock, adjustment and regulation of a watch, time as a standard unit, changing of the time itself, technical features, magnetism and watches, radium contamination, watch dials, hallmarks, the 'gold rush', things to watch out for when collecting watches and more. Mechanical watches hand wind, mechanical watches automatic, electric watches, electronic watches, quartz controlled electric watches, tuning fork watches, quartz controlled tuning fork watches, quartz watches, watches - radio controlled by an atomic clock. Also including antique- and vintage pocket watches. Over 300 pictures (black and white) of original watches, tools, equipment and others. *Toys in the Closet*, is a historical fiction set in the sensuous singing sands of the Indiana dunes on the southern shores of Lake Michigan. This is the journey of Nathan Franklin whose family participated in the most vicious confrontation between environmentalists and industrialist over the Hoosier coast. Nathan, a Jewish writer is out-of-season visiting his beach home, on Christmas Day '97 and exploring the story book rooms of Brighton House, a repository of so many works of art by artists who have painted the dunes and a treasury of family heirlooms each with vignettes of a landed past. Nathan though lonesome on Christmas in the aftermath of a winter blizzard realizes he isn't alone at all surrounded by his treasures and a very protecting lost lover. A story full of Hoosier pride, social justice, as viewed through the eyes of an accomplished Jewish contemporary at the end of his family's American Dream. Are you interested in flipping watches? An exciting area of collecting for clock and watch enthusiasts is literally opened up with this book. On the outside the automatic wristwatch is like its counterpart, but once the case is opened a different world appears. Here 200 watches are shown, each with three photos to show the dial, and the complete and partly disassembled movement. The book introduces all the Swiss manufacturers and provides an historical overview of the development of automatic watches from 1926 to 1978. Information on the functioning mechanism and construction of each design is offered along with the data needed to locate the watches chronologically. A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical and social contexts,

and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates the results of some fundamental, new and original research.
