Maggie Costello uncovers an assassination plot to kill the tyrannical new president. A blockbuster thriller from No.1 Sunday Times bestselling author Sam Bourne. Vital perspectives for the divided Trump era on what the Constitution's framers intended when they defined the extent—and limits—of presidential power One of the most vexing questions for the framers of the Constitution was how to create a vigorous and independent executive without making him king. In today's divided public square, presidential power has never been more contested. The President Who Would Not Be King cuts through the partisan rancor to reveal what the Constitution really tells us about the powers of the president. Michael McConnell provides a comprehensive account of the drafting of presidential powers. Because the framers met behind closed doors and left no records of their deliberations, close attention must be given to their successive drafts. McConnell shows how the framers worked from a mental list of the powers of the British monarch, and consciously decided which powers to strip from the presidency to avoid tyranny. He examines each of these powers in turn, explaining how they were understood at the time of the founding, and goes on to provide a framework for evaluating separation of powers claims, distinguishing between powers that are subject to congressional control and those in which the president has full discretion. Based on the Tanner Lectures at Princeton University, The President Who Would Not Be King restores the original vision of the framers, showing how the Constitution restrains the excesses of an imperial presidency while empowering the executive to govern effectively. A Pakistani man comes to grad school in the US and falls in love with the country. But he encounters rampant discrimination. His beard is torn from his

face. He undergoes a rectal exam. He is mercilessly beaten. He becomes completely radicalized after the wars in Afghanistan, Iraq, Syria, and Yemen in which millions of Muslims have died and in which the US has played a leading or a supportive role. His brother is killed by an American bomb. He wants to assassinate the US president. When the protagonist had not been radicalized, he had discovered a clear line of sight to the White House. At the last minute he is consumed by remorse and aborts his plan. The moral of the book is that the president should be moved to a secure location. That way future presidents would be protected. The President, the Pope, and the Prime Minister is a sweeping, dramatic account of how three great figures changed the course of history. All of them led with courage — but also with great optimism. The pope helped ordinary Poles and East Europeans banish their fear of Soviet Communism, convincing them that liberation was possible. The prime minister restored her country's failing economy by reviving the "vigorous virtues" of the British people. The president rebuilt America's military power, its national morale, and its pre-eminence as leader of the free world. Together, they brought down an evil empire and changed the world for the better. No one can tell their intertwined story better than John O'Sullivan, former editor of National Review and the Times of London, who knew all three and conducted exclusive interviews that shed extraordinary new light on these giants of the twentieth century. "Millions of Americans." declared Dallas megachurch pastor Robert Jeffries in 2017, "believe the election of President Trump represented God giving us another chance—perhaps our last chance—to truly make America great again. Our job was to elect him once God showed us the way. We thank Our Lord to this day that we did. We love Trump! Donald Trump got elected because a higher power whispered in the individual ears of millions of Americans. The voice said that together in this election, we could all make a difference, and Donald Trump would become that difference. The people trusted this self-made Billionaire to do what was best for America and not the bidding of slimy politicians or political donors and hacks. Donald Trump was the only candidate for president who offered Americans a breath of fresh air from the stodgy, bossy, establishment elites in both the Democratic and Republican Parties. In 2020, we need Trump again to defeat the Socialist Democrats and their hate. Our weapon again is Trump. Trump love will win the day. Trump once defied the status quo of rich donors controlling the government for their personal benefit. Donald Trump to many, including myself is a great gift from God himself. Donald J. Trump loves America and American traditional values. Just look at the goodness that he instilled into his own children. The corrupt anti-American mainstream press still does not like Trump because he represents normal God-loving and God-fearing Americans and not the fringe sectors of the country. They hate him. He calls them out as the fakes they are. They hate him because he is not controlled by anyone - Dem Party or wimpy swamp-dwelling Republicans. Neither gave Trump an inch and they undermine America by undermining our president. Donald Trump does pay attention to God and Americans are glad that he does. God is guiding our president to a second victory to help him lead America from 2021 through 2024. We know that the President already turned the economy around once and he is in the process of doing it again—this time while afflicted by the Coronavirus. Trump will overcome all of the country's issues included COVID-19, oppressive taxation; legal and illegal immigrants stealing the best jobs; regulations choking businesses; huge debt and deficits shackling our capital resources; a government Obamacare system that added taxes and made health worse; and corporate offshoring, which created a weaker nation. Joe Biden is ready to continue this because he supported Barack H. Obama's policies which had created the whole mess in the first place. Additionally, Trump freed our energy supply making us the world's largest energy producer. When Obama was in charge he redistributed wealth from producers to non-producers. He permit a huge, growing, inefficient government to operate. It continually lied, taxed too much and spent more than it had. Our government had become enemy # 1 of the people Mr. Biden wants to bring back those bad times calling them the good old days. A good plan, endorsed by Mr. Trump, along with good leaders such as Donald Trump & Mike Pence is now in place and the plan and the leaders are already saving US from Obama perdition. That's "Why God Gave US Trump!" Now it is up to use to thank god by giving Trump his second term. Amen! Teachers have examined many facets of the US presidency and

A Harper Perennial Political Classic, *The Making of the President 1960* is the groundbreaking national bestseller and Pulitzer Prize-winning account of the 1960 presidential campaign and the election of John F. Kennedy. With this narrative history of American politics in action, Theodore White revolutionized the way presidential campaigns are reported. Now back in print, freshly repackaged, and with a new foreword written by Robert Dallek, *The Making of the President 1960* remains the most influential publication about the election of John F. Kennedy. The memoirs of a legendary White House advisor chronicle the five decades he spent as an influential figure in Oval Office decision-making, from the recognition of Israel to the Vietnam War. Reprint. Major ad/promo. Nobody knows more about the duties, the difficulties, and the strategies of staffing and working in the White House than Brad Patterson. In *To Serve the President*, Patterson combines insider access, decades of Washington experience, and an inimitable style to open a window onto closely guarded Oval Office turf. The fascinating and entertaining result is the most complete look ever at the White House and the people that make it work. Patterson describes what he considers to be the whole White House staff, a larger and more inclusive picture than the one painted by most analysts. In addition to nearly one hundred policy offices, he draws the curtain back from less visible components such as the Executive Residence staff, Air Force One and Marine One, the First Lady's staff, Camp David, and many others—135 separate offices in all, pulling together under often stressful and intense conditions. This authoritative and readable account lays out the organizational structure of the full White House and fills it out the outline with details both large and small. Who are these people? What exactly do they do? And what role do they play in running the nation? Another exciting feature of *To Serve the President* is Patterson's revelation of the total size and total cost of the contemporary White House—information that simply is not available anywhere else. This is not a kiss-and-tell tale or an incendiary exposé. Brad Patterson is an accomplished public administrator with an intimate knowledge of how the White House really works, and he brings to this book a refreshingly positive view of government and public service not currently in vogue. The U.S. government is not a monolith, or a machine, or a shadowy cabal; above all, it is people, human beings doing the best they can, under challenging conditions, to produce a better life for their fellow citizens. While there are bad apples in every bunch, the vast majority of these people ply their trades honestly and earnestly, often in complete anonymity and for modest compensation. This book illuminates their roles, celebrates their service, and paints an eye-opening picture of how things really work on Pennsylvania Avenue. Do presidents inevitably lose support the longer they are in office? Does the public invariably rally behind presidents during international crises? What are the criteria by which the public forms its judgment about whether or not the president is doing a good job? And what is the role of daily news reporting and elite opinion in shaping the public's perception of the president's performance? This book addresses these questions and many others surrounding the dynamics of fluctuating public support for the president of the United States. Drawing its case material from the modern presidency from Kennedy through Reagan, with looks backward as far as Truman, this innovative work shows how the standing of the president with the American people has come to have a political life of its own. The author first examines two seemingly distinctive periods of opinion formation: the 'honeymoon' at the beginning of a presidential term and the 'rally' of presidential support that accompanies international crises. He then analyzes two previous explanations of public support - length of term in office and the state of the economy - and concludes that these explanations are, respectively, incorrect and incomplete. The author presents a model of information processing that ties public support to indications of policy success or failure brought to the attention of the public through daily news reporting by the media. The model is tested initially for the presidencies of Kennedy, Johnson, Nixon, and Ford; it is then refined and tested further for the Carter and Reagan presidencies. Every president has had a unique and complicated relationship with the intelligence community. While some have been coolly distant, even adversarial, others have found their intelligence agencies to be among the most valuable instruments of policy and power. Since John F. Kennedy's presidency, this relationship has been distilled into a personalized daily report: a short summary of what the intelligence apparatus considers the most crucial information for the president to know that day about global threats and opportunities. This top-secret document is known as the President's Daily Brief, or, within national security circles, simply "the Book." Presidents have spent anywhere from a few moments (Richard Nixon) to a healthy part of their day (George W. Bush) consumed by its contents; some (Bill Clinton and George H. W. Bush) consider it far and away the most important document they saw on a regular basis while commander in chief. The details of most PDBs are highly classified, and will remain so for many years. But the process by which the intelligence community develops and presents the Book is a fascinating look into the operation of power at the highest levels. David Priess, a former intelligence officer and daily briefer, has interviewed every living president and vice president as well as more than one hundred others intimately involved with the production and delivery of the president's book of secrets. He offers an unprecedented window into the decision making of every president from Kennedy to Obama, with many character-rich stories revealed here for the first time. By analyzing the leadership skills of five recent American presidents, this book seeks to demystify the elements and dynamics of effective presidential leadership which our democracy has come to depend upon and value. Building on the pioneering work of political scientist Fred Greenstein and others, this book argues that leadership in the White House can be explained and assessed by using a consistent set of criteria to analyze presidential performance. Siegel shows that presidential leadership is exercised by real, flawed human beings, and not by superheroes or philosopher-kings beyond the reach of scrutiny or critique.
