Essentials of Assessing, Preventing, and Overcoming Reading

Difficulties Oct 16 2019 Practical, effective, evidence-based reading interventions that change students' lives Essentials of Understanding and Assessing Reading Difficulties is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the

knowledge and confidence needed to accurately assess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension. Formatted for easy reading as well as quick reference, the text includes bullet points, icons, callout boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading remediation efforts have proven largely ineffective. School psychologists are routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice Accurately assess the reason(s) why a student struggles in reading Improve reading skills using the most highly effective evidence-based techniques Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success. Struggling students need help now, and Essentials of Understanding and Assessing Reading Difficulties shows how to get these students on track.

**E-Learning** Jan 11 2022 Adaptive E-learning was proposed to be suitable for students with unique profiles, particular interests, and from different domains of knowledge, so profiles may consider specific goals of the students, as well as different preferences, knowledge level, learning style, rendering psychological profile, and more. Another approach to be taken into account today is the self-directed learning. Unlike the adaptive E-learning, the Self-directed learning is related to independence or autonomy in learning; it is a logical link for readiness for E-learning, where students pace their classes according to their own needs. This book provides information on the On-Job Training and Interactive Teaching for E-learning and is divided into four sections. The first section covers motivations to be considered for E-learning while the second section presents challenges concerning E-learning in areas like Engineering,

Medical education and Biological Studies. New approaches to E-learning are introduced in the third section, and the last section describes the implementation of E-learning Environments.

*Professional Error Competence of Preservice Teachers* Feb 12

2022 This book discusses competence, teacher competence, and professional error competence of teachers, and emphasizes the need for a training programme that supports the latter. The book starts out by presenting results from previous studies that underline the necessity to train professional error competence of teachers, especially in the field of accounting. The studies analysed include research in the field of accounting, and on the efficacy of teacher training. Next, considerations on training programmes are presented. From these analyses, a training programme was designed to support professional error competence in accounting. This training programme aims for increased knowledge about students' errors (content knowledge) and offers strategies to handle these errors (pedagogical content knowledge). Both are central facets of professional error competence. The book describes the development, characteristics, implementation, and evaluation of this

programme. It details the test platform that was developed and used for the assessment of professional error competence, and critically discusses the results from the evaluation of the training programme from various perspectives. The current discussion on teacher training and expertise is influenced by empirical results obtained in international large-scale studies such as PISA and TIMSS. The findings of the studies underpin the discussion on teaching quality and teachers' professional competences. The key issue is that teacher competence has an impact on teaching quality and this, in turn, influences students' achievements. International comparative studies reveal that teachers often lack central competence facets, and therefore it is assumed that standard teacher training programmes may fail to successfully prepare student teachers for their tasks. Therefore, customized training programmes are currently being discussed. Their focus is mostly on pedagogical content knowledge and classroom practices, because these competence facets are essential for teaching quality.
