In *The Path of the Universal Christ*, the authors of the bestselling *Lost Years of Jesus* and *The Lost Teachings of Jesus* series recapture the heart of the Master's message--that we, like Jesus, are meant to realize our own innate divinity, that we are destined to become one with our own Higher Self. Church fathers suppressed Jesus' original teaching on the Christ within. But today, Mark and Elizabeth Prophet reveal our inner identity and the true goal of our life on earth. The world has fallen out of energetic balance, plagued with ignorance, hatred, pollution and chaos. In the Deep South, there is a remedy both powerful and dangerous--witches. At the peak of summer, Nina is living a fast-paced life in New York City. But when the earth's gravitational pull activates a gene-making her and a few others capable of magic-she is called to duty in southern Louisiana to lead a coven of witches and restore emotional, mental and spiritual balance to the world through magic. By autumn, witches are turning up dead and she has but one choice-defend the coven. And when she witnesses extraordinary powers beyond those of any known witch, Nina sets out on a magical quest through the dark and sultry swamps, voodoo shops, right-wing churches and alternate planes of consciousness to uncover the source of the dangerous gifts; all while trying to create peace not just within the coven, but with the people who knew her in the life she left behind. Southern charm meets devilish intent. Being nearly immortal and stuck in the body of a young girl alongside an injured demon has been a long road for Truddie Mae. As a Keeper, granted power by the fates to protect the veil using supernatural magic, she has grown weary from lack of excitement. Nestled within the swampy wilderness of her Florida home, her existence will soon be threatened. The veil, the barrier between our world and the astral planes, is in distress pleading for her help against a sinister new enemy that has breached this reality. Driven by a ravenous appetite for energy, it will stop at nothing until everything is consumed. Now, forced to work alongside a tri-blooded enigma, a nature mage, and a snobby ice enchantress, she must race to rescue others in its path and stop this wicked threat from ultimately unraveling the entire universe. In the bestselling tradition of *Stuff Matters* and *The Disappearing Spoon*: a clever and engaging look at materials, the innovations they made possible, and how these technologies changed us. Finalist for the 41st Los Angeles Times Book Award in Science and Technology and selected as one of the Best Summer Science Books Of 2020 by Science Friday. In *The Alchemy of Us*, scientist and science writer Ainissa Ramirez examines eight inventions—clocks, steel rails, copper communication cables, photographic film, light bulbs, hard disks, scientific labware, and silicon chips—and reveals how they shaped the human experience. Ramirez tells the stories of the woman who sold time, the inventor who inspired Edison, and the hotheaded undertaker whose invention pointed the way to the computer. She describes, among other things, how our pursuit of precision in timepieces changed how we sleep; how the railroad helped commercialize Christmas; how the necessary brevity of the telegram influenced Hemingway's writing style; and how a young chemist exposed the use of Polaroid's cameras to create passbooks to track black citizens in apartheid South Africa. These fascinating and inspiring stories offer new perspectives on our relationships with technologies. Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture, chronicling each invention and its consequences—intended and unintended. Filling in the gaps left by other books about technology, Ramirez showcases little-known inventors—particularly people of color and women—who had a significant impact but whose accomplishments have been hidden by mythmaking, bias, and convention. Doing so, she shows us the power of telling inclusive stories about technology. She also shows that innovation is universal—whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR. If he's real lucky, she won't die. Because if she does, all hope is lost.
