'At the age of thirteen, I knew I was destined to marry John Travolta. One day he would arrive on my North London doorstep, fall madly in love with me and ask me to marry him. Then he would convert to Islam and become a devoted

Muslim.' Shelina is keeping a very surprising secret under her headscarf - she wants to fall in love. Torn between the Buxom Aunties, romantic comedies and mosque Imams, she decides to follow the arranged-marriage route to finding Mr Right, Muslim-style. Shelina's captivating journey begins as a search for the One, but along the way she also discovers her faith and herself. A memoir with a hilarious twist from one of Britain's leading female Muslim writers, *Love in a Headscarf* is an entertaining, fresh and unmissable insight into what it means to be a young British Muslim woman. Shelina Janmohamed is a columnist for the Muslim News and EMEL magazine and regularly contributes to the Guardian., the BBC and Channel 4. She is much in demand as a commentator on radio and television and has appeared on programmes including Newsnight and The Heaven and Earth Show. Her award-winning blog, Spirit 21, is hugely popular. *Love in a Headscarf* is her first book. For

years, as I practiced natural health and holistic nutrition, I have seen miracle shifts in health and healing when people learn to simply 'listen'... I have assisted people change their diet, supplement the missing nutrients, implement exercise and manage their stresses... all these measures are essential to create great improvement in health and healing... yet real shifts and amazing miracles only happened the moment people got hold of the root cause of their illness, the hidden reason behind their struggle... the moment they learned to listen to their body needs and implement the required emotional, spiritual and mental shift in their approach to life. This book is about your thoughts, emotions, lifestyle, beliefs and actions and their relationship to health and illness. It challenges you to dig deeper into the root cause of your challenges, diseases or concerns; to explore the associated thought patterns, beliefs and behaviors; and then take positive steps towards

self-healing. The aim of this book is to teach you how to listen to your 'Body Whispers' and heed its subtle warning signs, then guide the way towards energy restoration and holistic healing by integrating and harmonizing all of You: Body, Mind, Heart and Soul. Presenting encryption algorithms with diverse characteristics, Image Encryption: A Communication Perspective examines image encryption algorithms for the purpose of secure wireless communication. It considers two directions for image encryption: permutation-based approaches and substitution-based approaches. Covering the spectrum of image encryption principles and techniques, the book compares image encryption with permutation- and diffusion-based approaches. It explores number theory-based encryption algorithms such as the Data Encryption Standard, the Advanced Encryption Standard, and the RC6 algorithms. It not only details the strength of various

encryption algorithms, but also describes their ability to work within the limitations of wireless communication systems. Since some ciphers were not designed for image encryption, the book explains how to modify these ciphers to work for image encryption. It also provides instruction on how to search for other approaches suitable for this task. To make this work comprehensive, the authors explore communication concepts concentrating on the orthogonal frequency division multiplexing (OFDM) system and present a simplified model for the OFDM communication system with its different implementations. Complete with simulation experiments and MATLAB® codes for most of the simulation experiments, this book will help you gain the understanding required to select the encryption method that best fulfills your application requirements. In this impressive book, Edward S. Herman and David Peterson examine the uses and abuses of the word "genocide." They

argue persuasively that the label is highly politicized and that in the United States it is used by the government, journalists, and academics to brand as evil those nations and political movements that in one way or another interfere with the imperial interests of U.S. capitalism. Thus the word "genocide" is seldom applied when the perpetrators are U.S. allies (or even the United States itself), while it is used almost indiscriminately when murders are committed or are alleged to have been committed by enemies of the United States and U.S. business interests. One set of rules applies to cases such as U.S. aggression in Vietnam, Israeli oppression of Palestinians, Indonesian slaughter of so-called communists and the people of East Timor, U.S. bombings in Serbia and Kosovo, the U.S. war of "liberation" in Iraq, and mass murders committed by U.S. allies in Rwanda and the Republic of Congo. Another set applies to cases such as Serbian aggression in Kosovo

and Bosnia, killings carried out by U.S. enemies in Rwanda and Darfur, Saddam Hussein, any and all actions by Iran, and a host of others. With its careful and voluminous documentation, close reading of the U.S. media and political and scholarly writing on the subject, and clear and incisive charts, *The Politics of Genocide* is both a damning condemnation and stunning exposé of a deeply rooted and effective system of propaganda aimed at deceiving the population while promoting the expansion of a cruel and heartless imperial system. "A continuously engaging, vitally engaged play about thorny questions of identity and religion in the contemporary world, with an accent on the incendiary topic of how radical Islam and the terrorism it inspires have affected the public discourse." *New York Times* *New York Today*. Corporate lawyer Amir Kapoor is happy, in love, and about to land the biggest career promotion of his life. But beneath the veneer, success

has come at a price. When Amir and his artist wife, Emily, host an intimate dinner party at their Upper East Side apartment, what starts out as a friendly conversation soon escalates into something far more damaging. Winner of the Pulitzer Prize for Drama, 2013, *Disgraced* premiered in Chicago before transferring to New York's Lincoln Center in 2012. This new Modern Classics edition features an introduction by J.T. Rogers. Contains a fully updated A-Z guide to over 1,200 definitions of terms from the fields of literary theory and criticism, rhetoric, versification and drama. Recommendations for further reading are included. Although they existed more than a millennium apart, the great civilizations of New Kingdom Egypt (ca. 1548-1086 BCE) and Han dynasty China (206 BCE-220 CE) shared intriguing similarities. Both were centered around major, flood-prone rivers--the Nile and the Yellow River--and established complex hydraulic systems to manage their

power. Both spread their territories across vast empires that were controlled through warfare and diplomacy and underwent periods of radical reform led by charismatic rulers--the "heretic king" Akhenaten and the vilified reformer Wang Mang. Universal justice was dispensed through courts, and each empire was administered by bureaucracies staffed by highly trained scribes who held special status. Egypt and China each developed elaborate conceptions of an afterlife world and created games of fate that facilitated access to these realms. This groundbreaking volume offers an innovative comparison of these two civilizations. Through a combination of textual, art historical, and archaeological analyses, *Ancient Egypt and Early China* reveals shared structural traits of each civilization as well as distinctive features. Edward Said's *Orientalism*, now more than fifty years old, has to be one of the most frequently cited books among academics

in a wide range of disciplines, and the most frequently assigned book to undergraduates at colleges. Among the common questions raised in response to Said's book: Did scholars in Western Europe provide crucial support to the imperialist, colonialist activities of European regimes? Are their writings on Islam laden with denigrating, eroticized, distorting biases that have left an indelible impact on Western society? What is the "Orientalism" invented by Europe and what is its impact today? However, one question has been less raised (or less has been done about the question): How were the Orientalist writings of European scholars of Islam received among their Muslim contemporaries? An international team of contributors rectify this oversight in this volume. A historical survey of the Iraqi media from its beginning up to the present day, focusing on the post-2003 media scene and the political and societal divisions that occurred in Iraq

after US-led occupation. Investigates the nature of the media outlets and offers an analysis of the way Iraqi satellite channels covered the 2010 general elections. Tazkiyah, self-development, lies at the core of Islamic life. Success in this life and the next depends very much on it. There are many works in Islamic literature on the subject of self-development, written from a variety of angles. This anthology has been compiled to meet the need for self-development from an authentic Islamic perspective. The interpretation of sacred scriptures engenders vivid debates in religious communities, both at the scholarly and grass-roots levels. Issues of debate are the hermeneutical assumptions, the methods of interpretation, and the constructive and harmful implications of certain readings. For Christian and Muslim communities, themes related to God's grace, violence, gender relations and ecology, are topical. As scholars from different

contexts and faith backgrounds together interpret sacred texts they gain fresh insights into their meaning and their transformative dynamics. Essays by authors with expertise in scriptural interpretation, religious studies, pastoral care, philosophical theology, gender studies and pedagogy explore Christian and Muslim perspectives on scriptural interpretation, and discuss how to understand how God communicates with the world today. A great book of inspirational advice on the subject of spiritual and self development. Thirteenth-century Sufi poet, mystic, and legal scholar Muhyi al-Din ibn al-'Arabi gave deep and sustained attention to gender as integral to questions of human existence and moral personhood. Reading his works through a critical feminist lens, Sa'diyya Shaikh opens fertile spaces in which new and creative encounters with gender justice in Islam can take place. Grounding her work in Islamic epistemology, Shaikh

attends to the ways in which Sufi metaphysics and theology might allow for fundamental shifts in Islamic gender ethics and legal formulations, addressing wide-ranging contemporary challenges including questions of women's rights in marriage and divorce, the politics of veiling, and women's leadership of ritual prayer. Shaikh deftly deconstructs traditional binaries between the spiritual and the political, private conceptions of spiritual development and public notions of social justice, and the realms of inner refinement and those of communal virtue. Drawing on the treasured works of Sufism, Shaikh raises a number of critical questions about the nature of selfhood, subjectivity, spirituality, and society to contribute richly to the prospects of Islamic feminism as well as feminist ethics more broadly. This book presents the actual statements and writings of jihadis expressing their views on virtually every subject relevant to their cause. It is not about

Islam as it is practiced in its many varieties in Muslim communities throughout the world, nor is it about Islamic fundamentalism or the various Islamist political movements. Rather, it is about a small group of Muslims who carry out and promote terrorism in the name of Islam. Because the jihadis' statements are often more appalling and more profoundly revealing than the accounts that have been written about jihadi terrorism, this book provides unfiltered access to a broad range of the stories, rationales, ideas, and arguments of jihadi terrorists and those who support them. Introductory and contextual material is also included, to provide the background and origins of what the jihadis are saying?to each other and to the world. It is hoped that this will provide greater insights into the motives, plans, and participants in jihadi terrorism, as well as the nature of the threat they pose. Not all of the quotations are from prominent jihadis. Some have been selected because they are

representative, others because they are contradictory, and still others because they provide a unique insight into the jihadi mentality. On the tail of Dr. Brown's two theological tsunamis, MisGod'ed and God'ed, comes this indispensable Islamic primer. Bearing True Witness takes its rightful place at the conclusion of this trilogy of theological works by providing essential yet practical advice on how to correctly live the chosen religion of Islam. Kenneth Perkins's second edition of A History of Modern Tunisia carries the history of this country from 2004 to the present, with particular emphasis on the Tunisian revolution of 2011 - the first critical event of that year's Arab Spring and the inspiration for similar populist movements across the Arab world. After providing an overview of the country in the years preceding the inauguration of a French protectorate in 1881, the book examines the impact of colonialism on the country, with particular attention to the

evolution of a nationalist movement that secured the termination of the protectorate in 1956. Its analysis of the first three decades of independence, during which the leaders of the anticolonial struggle consolidated political power, assesses the challenges that they faced and the degree of success they achieved. No other English-language study of Tunisia offers as sweeping a time frame or as comprehensive a history of this nation. Michael is drawn to his new classmate Mina, but they're on opposite sides of an issue that's tearing their town apart. His parents are part of an anti-immigration group, while her family have fled their besieged home in Afghanistan. As tensions rise, lines are drawn and both must decide what they want their world to look like, no matter the cost. This text outlines for the first time a structured articulation of an emerging Islamic orientation to psychotherapy, a framework presented and known as Traditional Islamically Integrated

Psychotherapy (TIIP). TIIP is an integrative model of mental health care that is grounded in the core principles of Islam while drawing upon empirical truths in psychology. The book introduces the basic foundations of TIIP, then delves into the writings of early Islamic scholars to provide a richer understanding of the Islamic intellectual heritage as it pertains to human psychology and mental health. Beyond theory, the book provides readers with practical interventional skills illustrated with case studies as well as techniques drawn inherently from the Islamic tradition. A methodology of case formulation is provided that allows for effective treatment planning and translation into therapeutic application. Throughout its chapters, the book situates TIIP within an Islamic epistemological and ontological framework, providing a discussion of the nature and composition of the human psyche, its drives, health, pathology, mechanisms of psychological change, and

principles of healing. Mental health practitioners who treat Muslim patients, Muslim clinicians, students of the behavioral sciences and related disciplines, and anyone with an interest in spiritually oriented psychotherapies will greatly benefit from this illustrative and practical text. Articles chiefly on social life and customs of Kashmiri Pandits of India. This book is the real story of my personal experience in Vietnam.

Contrary to popular belief, it was not a war of two countries fighting one another. It was written to expose the racial issues in Vietnam that you never saw on the evening news. I feared for my life every day, not from the Viet Cong. I had to watch my back 24-7 from men who wore the same uniform as me. At first, it made me bitter. I failed to find any connection between the racial tensions in the USA and black troops serving in Vietnam. How could I be held responsible for the conduct of other people more than 10,000 miles from me, people I had never even

met? Later I realized that Vietnam made me stronger as well as mistrustful. I felt free in Vietnam; I could go anywhere I wanted without any fear whatsoever. I was called "soul brother" and told almost daily that the Vietnamese and black people had the same enemy. I have to admit, they did have a point. My conscious is clear, I never harmed anyone in Vietnam and God is my witness! Multimedia computing has emerged in the last few years as a major area of research. Multimedia computer systems have opened a wide range of applications by combining a variety of information sources, such as voice, graphics, animation, images, audio, and full-motion video. Looking at the big picture, multimedia can be viewed as the merging of three industries: the computer, communications, and broadcasting industries. Research and development efforts in multimedia computing can be divided into two areas. As the first area of research, much effort has been

centered on the stand-alone multimedia workstation and associated software systems and tools, such as music composition, computer-aided education and training, and interactive video. However, the combination of multimedia computing with distributed systems offers even greater potential. New applications based on distributed multimedia systems include multimedia information systems, collaborative and videoconferencing systems, on-demand multimedia services, and distance learning. *Multimedia Tools and Applications* is one of two volumes published by Kluwer, both of which provide a broad introduction to this fast moving area. This book covers selected tools applied in multimedia systems and key multimedia applications. Topics presented include multimedia application development techniques, techniques for content-based manipulation of image databases, techniques for selection and dissemination of digital video, and tools for

digital video segmentation. Selected key applications described in the book include multimedia news services, multimedia courseware and training, interactive television systems, digital video libraries, multimedia messaging systems, and interactive multimedia publishing systems. The second book, *Multimedia Systems and Techniques*, covers fundamental concepts and techniques used in multimedia systems. The topics include multimedia objects and related models, multimedia compression techniques and standards, multimedia interfaces, multimedia storage techniques, multimedia communication and networking, multimedia synchronization techniques, multimedia information systems, scheduling in multimedia systems, and video indexing and retrieval techniques. *Multimedia Tools and Applications*, along with its companion volume, is intended for anyone involved in multimedia system design and applications and can be used as

a textbook for advanced courses on multimedia. This inspiring book explains how to meditate on eight beautiful verses that comprise one of Buddhism's best-loved teachings, Eight Verses of Training the Mind. Composed by the great Tibetan Bodhisattva Geshe Langri Tangpa, this short poem shows how we can transform all life's difficulties into valuable spiritual insights. Geshe Kelsang Gyatso now shares this ancient wisdom with all those seeking meaning and lasting happiness in their modern lives. An abridged 2016 Edition for Dua and new Muslims. At a time in which the Muslims are beset with trials from every periphery and within, comes this heartening book rooted in the commandments of Allah (swt), the Sunnah and the excellent guidance and examples of the Muslims that have come before us. Do not Be Sad is an absolute must-read for all people. It is full of practical advice on how to replace sadness with a pragmatic and ultimately

satisfying Islamic outlook on life. It exposes to the modern reader how Islam teaches us to deal with the tests and tribulations of this world. So, take heart and hold firmly onto the rope of Allah. Millennium transcends boundaries – between epochs and regions, and between disciplines. Like the Millennium-Jahrbuch, the journal Millennium-Studien pursues an international, interdisciplinary approach that cuts across historical eras. Composed of scholars from various disciplines, the editorial and advisory boards welcome submissions from a range of fields, including history, literary studies, art history, theology, and philosophy. Millennium-Studien also accepts manuscripts on Latin, Greek, and Oriental cultures. In addition to offering a forum for monographs and edited collections on diverse topics, Millennium-Studien publishes commentaries and editions. The journal primary accepts publications in German and English, but also considers submissions in French, Italian,

and Spanish. If you want to submit a manuscript please send it to the editor from the most relevant discipline:
